FieraMilano Rho Fairgrounds
June 09-12, 2026
Biennial Expo and Conference
for the industry of composite materials

Assago, September 16, 2025

REGISTRATIONS ARE OPEN FOR COMPOSITES FUTURE
In Milan, from 9 to 12 June 2026, concurrently with Xylexpo and Plast

The starting flag is waving for companies interested in exhibiting at the first edition of **Composites Future**, the biennial exhibition for the composite materials industry (technology, equipment, materials), held in Hall 18 of the FieraMilano-Rho expo center next June 9-12, 2026. Exhibitors registering to the expo and conference within November 30, 2025, will benefit from a **reduction on participation fees**.

The event is part of the new exhibition format “**Matec-materiali e tecnologie**”, a springtime date dedicated to the manufacturing industry, including **Plast** – exhibition of technologies for the plastic and rubber industry – and **Xylexpo**, biennial international exhibition of wood and furniture technology. Three exhibitions for one big event with a focus on “multimateriality”, with an expected attendance of **1,700 exhibitors** and **60 thousand visitors**, 30 percent from abroad, with a net exhibition area close to **70 thousand square meters**.

The event – promoted by **Assocompositi**, the Italian association of composites and similar materials – fills a gap in the exhibition calendar, adding an intensive schedule of meetings, in-depth presentations and practical demos that will illustrate the evolution of this important industry in the manufacturing arena, highlighting the close link with technologies for other industry that have been extensively applied also in the domain of composite materials.
