designed to (description of functionality)

Profimat 30 is a moulder dedicated to small businesses with restricted floor space and restricted connecting load, which allows not only planing, but also to run profiles. Both in high quality, safe for the operator and cost-efficient.

This solution offers the following innovative features:

- Compact design with little space requirement, therefore perfectly suitable for small businesses
- Machine can be easily repositioned using a lifting cart and can be placed close to a wall
- High repeating accuracy of products due to saving of profile data and setting values in the machine control
- Automatic positioning in width and thickness for simple and quick machine setup
- High reliability due to use of durable components
- High operator safety due to fulfilment of the latest safety standards
- High quality products (surface, dimensional accuracy, repeating accuracy) due to smooth running of workpieces, secure guiding, high precision spindles and heavy-duty machine frame
- Little maintenance requirement due to proven machine technology
- High energy efficiency due to use of the latest technology (e.g. frequency convertors) and fulfilment of the latest standards
- Energy-efficient dust extraction with optimum chip flow and large diameter of hoses to reduce required air velocity
- Cost-efficient and profitable, even if the machine only runs on occasion

The award has been created to recognize innovative solutions presented at Xylexpo, therefore the jury will only consider solutions / activities launched after January 1st, 2020.

The applicant takes full responsibility for the statements contained herein and accepts that, in case of discrepancies and/or non-compliance, the nomination may be canceled and/or the prize withdrawn (if already assigned).

Put an X on the correct option:

<i>Is this solution a "global preview"?</i>	YES	X NO
<i>If NO, is it a new solution for the Italian market?</i>	X YES	NO
<i>If NO, where was it presented for the first time?</i>		
<i>In which year? Is it currently in production?</i>	X YES	NO
